

ARMY LISTS AND NATIONAL CHARACTERISTICS

Additional data on national characteristics are provided to give the player a sense of the transitional nature of warfare during this era. The standardization of some data has been done to simplify the lists especially for players new to this era. Many regiments were known by the names of their commanders rather than number or regional names. This means that during a war a regiment could have several names depending on losses and promotions. Providing such information would greatly lengthen (and increase cost) the rules. Unit strengths are given at paper levels which is easier to standardize unit sizes and help play balance. If you want to do actual field levels, then you can use casualty caps. After several years of campaigning, some regiments listed as two battalions were often reformed as a one battalion regiment or the number of companies reduced in a regiment. A simple unit point system is provided to assist players in balancing scenarios.

Definitions. Army = The number of units in the Army; Bns = The number of foot battalions or mounted squadrons per regiment; Year Rgt (ex 1705 Rgt) = Indicates an organizational change from regiments raised earlier; Cos = the number of companies per battalion/squadron/regiment;

I or IND = Indicates an Independent company or Squadron; +G = indicates that there is a grenadier company attached; MEN = Men per company; CS = Castings per stand (If more than 160 foot/8 castings OR 60+/ 3 castings mounted authorized then the use of a double stand is recommended. MMG = Melee/Morale Grade (ratings 0-4); #P + The company has a few pikemen assigned to its majority musket unit. (*) = One of the units of this type has a guard title; ATT+ = Independent company attached to the regiment/battalion. @: 2 Cos mounted on 1 stand
#+G/# = Two Bn Rgts with a different number of companies per Bn or Gren attached to one Bn.

Tactical Comments.

Volley Fire. The army used the tactic of the entire unit firing by rank then pausing to reload.

Platoon Fire. The army tactic of firing portions of a unit which reload immediately thus providing a more continuous level of fire.

STEEL CAVALRY melee tactics. The Cavalry unit charges at a slightly faster rate and relies on blades and impact to win.

FIRE CAVALRY melee tactics. The Cavalry unit attacks at a slower pace and may even halt. They rely on the fire from their pistols and sometimes muskets to break an enemy.

MIXED CAVALRY melee tactics. The Cavalry unit attacks at a slower pace and may even halt. at an extended range to fire pistols before advancing to contact. They rely on both the fire from their pistols plus the follow up by rapid contact to break an enemy.

Mixed Melee weapons. A foot unit armed with a combination of swords and spears often associated with irregular forces and poorly armed militia.

PIKE units are those equipped solely or with a majority of pikes. Those with just a few pikes mixed, like the Spanish with 10 men, are rated as musket with a modifier when facing Cavalry.

Machlock : Troops are armed with bows, inferior muskets or poorly trained or mixed among a majority of blade weapons. Examples include Highlanders, “0” rated troops, Moghuls, natives.

Firelock: Troops whose volley ability is limited due to poor training (“1” rated troops) or are dismounted foot from dragoons / mounted infantry units.

Flintlock : Troops armed with modern muskets and/or veteran/ well trained troops. Includes Guard, Grenadier and other MMG 3 and 4 units unless designated otherwise.

Cav Tactic =Fire Fire Tactic = Volley Firelock 1690 & Flintlock in 1702

Arty Notes : They did not use regimental guns. Guns were converged into batteries and deployed throughout. Most batteries were 4 or 6 guns. Most guns were between 4pdr, 8pdr and 12 pdr. carriages were painted red with black metal.

Grenadiers are MMG 3 and are CS 3 on HS. The 1702 Inf odd company was deployed on the flank as ‘skirmishers” so should be CS 3 on HS. 1690 Inf contain 5 muskets and 1 Pike per stand. Pikes were dropped in 1702. Guard Regiments include the Swiss, French, Queens and Dauphin. “Old” Regiments retained the 1690 3 or 4 battalion establishment and I have rated as elites. Regiments include the Champagne, Picardie, Piemont, Normandy and Navarre.

Feudal Cavary includes local levies and suspect allies , such as Tartars.

Spahis include more dependable feudal retainers, mercenaries and levies.

Tufekcis are treated as Dragoons. Players can downgrade the MMG of up to ½ of any troop type. Janissary and Tufekcis troops fire as Firelock rated troops.

Artillery notes ; A wide variety of guns used with heavy seige guns being dominant.

Recommendation : 1 x 2 gun section per infantry Bn deployed. Any guns heavier than 6 pdr are deployed in covered batteries up to 6 sections each. Smaller guns can be assigned to Bns.

Most Subsidy regiments can be found under their country of origin list.

Grenadier MMG 3. Line Grenadiers CS 4 and not merged with other companies.

Guard and Marine Grenadiers were CS 5 and not merged with other companies.

Cav Tactic = Steel Fire Tactic = Platoon Flintlock

Artillery notes: Ratio of 1 guns per 700 men including cavalry. Carriages painted blue.

1707 each foot regiment assigned 2 x 3pdr guns.

Cav Tactic = Fire Fire Tactic = Volley & Flintlock

Artillery notes:

Reintroduced pike option is not reflected in the Army Lists.

Infantry can be mounted as CS= 8@ to reflect reduced strengths of campaigning/subsidy troops.

1690 and 1709 Infantry units are for the Great Northern War. 1703 is Subsidy troops for Austria.

SCOTLAND- Highland-Jacobite 1715 -1719

Lowland Bns have ½ companies all pike and ½ all musket.

Variable Highland morale : Roll d10 per stand. 1-2 = 0; 3-4 = 1; 5-6-7 = 2; 8-9 = 3; 0 = 4

Highland units are mixed armed but can fire ONE volley per game at Matchlock rate.

Artillery notes : Max 6 light guns all mounted one per section (My suggestion)

Army Max % : Highland = 80%; Lowland = 30%; English/Irish = 10%; Foreign = 5%

POINT SYSTEM

Players desiring to create a balanced non-historical scenario will need a point system to assist in balancing the forces. Of course the defender with entrenched positions and buildings in his setup area will be at a distinct advantage unless the attacker is given additional troops to offset them. I would recommend a 1.5 to 1 or 2 to 1 point advantage for such scenarios.

. Modifiers for national Characteristics such as Firelock rated or Platoon tactics are not considered in the point system. They are handicaps or advantages inherent with the Army.

Unit Value determination procedure.

Infantry units count the number of men in the unit (not per stand) and add modifiers for morale

Cavalry units count the number of men in the Squadron (not per stand) multiply the number by 2, then add modifiers for morale

Morale Modifiers : MG 0 = +0; MG 1 = + 10, MG 2 = + 20, MG 3 = + 30, MG 4 = + 40

Artillery costs are calculated per gun.

2pdr- 4pdr = 10 points; 6pdr-8pdr = 20 points; 9pdr-12pdr = 30 points; 13pdr+ = 40 points

1705 Inf = 2 companies of CS 5 attached to Bns (or converged at Brigade)

Mounted Cavalry either 3 or 4 castings per stand. 1 Co per Cav Rgt is Horse Gren MMG3.

After 1705 a number of Hired Rgts included: Danes 7 rgts (1 Bn), Wurzburg 4 Rgts (1 Bn), Pfalz 4 Bns; Saxe Gotha 2 Rgts (1 Bn), Prussia 6 Rgts (1 Bn) and 4 rgts (2 Bns)

Artillery Notes ; field guns ranged from 2 pdr galloper to 12 pdr. An example of one park had 80% 3 pdr regimental and 20% 6 or 8 pdr field. The 1705 infantry Rgt had 1 x 3pdr attached.
