# The Battle of Neerwinden, 18th of March 1793

A Grande Armee Scenario by Greg Savvinos

After the success of the French armies at Valmy the Armee du Nord under Dumouriez surged in to the Austrian Netherlands. The outnumbered defenders under Saxe-Weimar were defeated at Jemappes on November 6<sup>th</sup> 1792 and within the month all of Belgium was in French hands. The Austrian force retreated to the Rhine and awaited reinforcements whilst Dumouriez invaded the United Provinces.

As General Miranda attempted to take Maastricht without the benefit of siege artillery, the strengthened Imperial forces under Coburg launched the long awaited counter attack and forced the Republicans to retreat. Dumouriez hurried back from Holland and concentrated his army at Louvain .

On March 18<sup>th</sup> 1793 the French attacked Coburg's Austrians, on the site of Marshall Luxembourg's famous victory over William of Orange in 1693, Neerwinden.

In the ensuing battle Dumouriez staked everything on an all out attack . The French met with some success in the centre and on the right and temporarily took possession of Neerwinden, but determinded Austrian counter attacks, drove them back to their starting positions by dusk. However Miranda's force suffered a total defeat at the hands of the Austrian Advanced Guard, led by a young scion of the Hapsburg dynasty Archduke Charles, and more than 6000 French deserted overnight.

Dumouriez was forced to fall back but was able to fight again a few days later at Louvain, where he was again beaten. At this point he began secret negotiations with Coburg, which culminated in his attempt to turn the Armee du Nord against the Convention in Paris and to reinstate the monarchy. This plan foundered on the fact that most of his officers and men were genuinely attached to the cause of the revolution and Dumouriez and his party were lucky that the marksmanship of Lt Col Davout's volunteer battalion was not of the same order as their patriotism. Dumouriez, fled to the Austrians.

An important consequence of Neerwinden was that from that point forward every French commander was in the shadow of the guillotine and nobody was above suspicion. The Terror was at hand.

#### The battlefield of Neerwinden 2 Neer Helissem Map Key Woomersom Great Geet R Α High Ground Elissem Higher Ground 型Overhespen В Town Raucou Gutzenhoven C Neerhespen Road Orsmae Stream Little Geet R D River French Dormael Е Neerlanden Austrian

#### The Scenario

The weather is normal, with no variation. The ground is hard. The game's Basic Length is 6 turns. The town of Leau (D9) is hard cover, all other towns are soft cover. The Great and Little Geet rivers can only be crossed at bridges, all other streams are fordable and are treated as obstacles. The morale of the Austrian army is Confident. Its Break Point is 9. The morale of the French army is Fair. Its Break Point is 8.

## Alternative Neerwindens, play balancing etc.

#### 1. Lower French Morale

The French Armee du Nord was organised in to brigades composed of both old regular army units and new (1791-92) volunteer units, which could justify downgrading all line infantry brigades to "Conscript" instead of "Trained". I chose to go with classing line infantry as "Trained" partly because, most of the volunteer battalions were from the more experienced volunteers of 1791, and partly because the French had won some minor actions in the days before the battle, which might have lifted morale. Well that and the fact that the French have enough problems. But if you really want to stick the boot in to the regicides feel free to try the following modifications to the scenario:

- Treat all French infantry brigades designated as Line as being rated "Conscript" for all game purposes.
- Reduce the strength of all Line infantry brigades with more than 4 SPs by one.
- The French army is now classified as "Shaky" and its break point is now 7.

#### 2. Greater French Concentration

Dumouriez had spread his forces across a wide front. Had he concentrated his forces he might have been able to get a significant local superiority. To give reflect a greater French concentration of force you might want to try this:

- Austrians deploy first in the positions indicated by the scenario map.
- French can then deploy their forces anywhere in B and C 1 to 6 as long as they are not within 12" of an Austrian unit.
- Miaczynski's detachment is absorbed in to Miranda's force. Miranda's new command radius is 10"

#### 3. Stronger Austrian Artillery

Look to be perfectly honest apart from the French horse artillery I could not find any real information on what either side's artillery consisted of. All I had to go on where a few general references to the fact that the Austrians were well supplied with guns and that they were effective. In the scenario I decided this meant a 12pdr for each Austrian force, with slightly more in the Advanced Guard. If you feel this is too miserly add one 12pdr to each Austrian force.

#### 4. French Skirmishers.

I was of two minds on how to reflect the French skirmishers for this early period of the Revolutionary Wars. Should they be as numerous and effective as they had clearly become by the time of Hondschoote in September 1793, which would mean a rating of SK2, or can it be argued that the training camps set up by Custine in May 1793 were instrumental in improving the skirmishing abilities of the Republican armies? I tend to incline to the latter view so in the standard scenario French line infantry generally has a skirmish rating of SK1, however if you think this is below their capabilities, or you simply want to give the French a slight edge, class all French infantry and mixed brigades as SK2.
